## ALZHEIMERS AWARENESS MONTH

**Worldwide, more than 55 million people are living with Alzheimer's or another dementia.**

June is Alzheimer's & Brain Awareness Month — an opportunity to hold a conversation about the brain. Everyone is at risk to develop Alzheimer's, the only leading cause of death that cannot be prevented, cured or even slowed.

Over the last year all of our employees have worked through online dementia courses and our office staff and engineers have shown real enthusiasm for developing their understanding of brain degenerating diseases.

Also, two of our management team, Julie and Dave, have recently raised almost £1000 during Trek 26.

## TEAM UPDATES!

### Training!

Our team has undertaken specialist software training lately to improve communication between our in-field engineers and our office team! This training enables ADS to work smarter from the clients first call through to scheduling, quoting, job completion, invoicing and payment.

We work hard to make ADS the most trusted and respected mechanical and electrical contractor in our industry.

That's why if you're ever around the ADS office in Preston, you'll often see our team undertaking new training to improve the service we provide every client!

## WE'RE RECRUITING

### Meet our newest apprentice Andrew!

Andrew has taken on an apprenticeship while studying a Level 3 Electrotechnical Qualification, which facilitates learners to qualify in electrical installation and electrical maintenance.

He is currently in his final year but still has a couple of final assessments to complete before he'll be finished!

Hopefully, he should be fully qualified within the next 10 months, with the help of ADS.

Outside of work, like a lot of young people, Andrew enjoys staying fit by regularly going to the gym and going to gigs for live music!

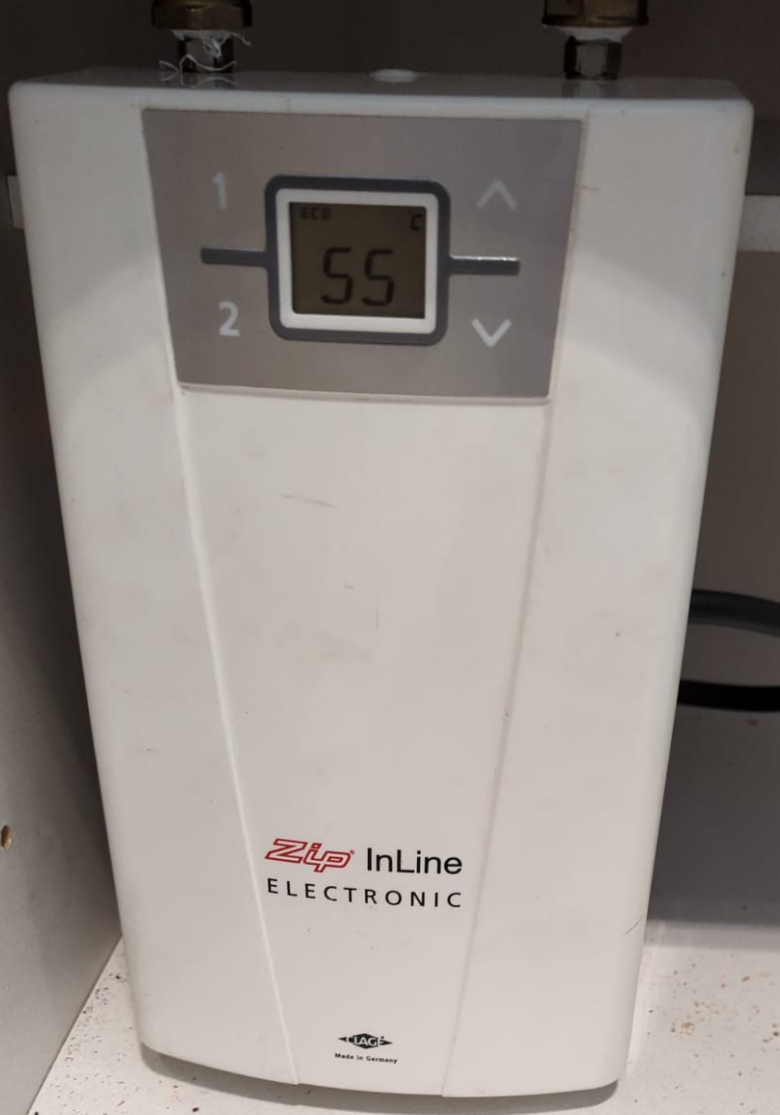

## PROJECT SPOTLIGHT: AIR CON MAINTENANCE

**Here our engineer Michael is carrying out maintenance on an air conditioning unit, which is essential to the safe and effective running of the unit!**

Cleaning the air conditioner gets rid of dust and debris, which when trapped do not allow your system to run as efficiently as it could.

A dirty air conditioner puts strain on its components and could lead to expensive repairs in the future. If your heating or cooling systems haven't been serviced in the last six months, get in touch with our team.

## PROJECT SPOTLIGHT: ELECTRIC WATER HEATER

**Our Senior Technical Engineer Nigel recently installed this Zip inLine electric water heater at the Our Lady Star of the Sea, providing instant hot water while saving money on bills!**

This unit replaces the need for an immersion heater, which takes longer to provide hot water and can often waste energy in the warmer months. With all the options of boilers and hot water heaters out there, it's tough to pick the right option for your home, or facility, and for your particular needs.

Speak to our experts today to learn what product is best for you!

# COMMERCIAL

ADS offers bespoke M & E and PPM packages to the commercial sector. We have a high level of expertise, multi-discipline engineers and outstanding customer service.

# RESIDENTIAL

ADS Electrical & Mechanical Limited are a Preston based plumbing, heating and electrical specialist and we have been serving the North - West for many years.

## COMPLETE BOILER, HEATING, PLUMBING & ELECTRICAL COVER FOR YOUR HOME, WITH A TEAM YOU CAN TRUST!

Our range of Landlord products will keep your property well maintained and your tenants happy. We offer everything from boiler cover to complete HomeCover.

As a landlord, do you know about the new electrical testing regulation that is now needed by law? You must have an electrical installation condition report (EICR) for all tenants. Learn more!
